Opera refers to a dramatic art form, originating in Europe, in which the emotional content is conveyed to the audience as much through music, both vocal and instrumental, as it is through the lyrics. By contrast, in musical theater an actor's dramatic performance is primary, and the music plays a lesser role. The drama in opera is presented using the primary elements of theater such as scenery, costumes, and acting. However, the words of the opera, or libretto, are sung rather than spoken. The singers are accompanied by a musical ensemble ranging from a small instrumental ensemble to a full symphonic orchestra.

13. b. Read the following anecdote and prepare a cartoon strip.

A man had lost his key. He was searching for it on the road under the neon light. His friends and passers-by joined him, and they all searched for the lost key. After some time, one of them asked him, "Where did you lose your key?" And he answered, "At home." When his friends asked him as to why he was searching for it on the road under the neon light, he replied, "But there's light only here!"

Note: Let there be five sketches:

PART - D 2 x 15 = 30

Answer the following

Answer should not exceed 700 words or four pages

14. a. Develop story board for the given passage.
Dolphins are regarded as the friendliest creatures in the sea and stories of them helping drowning sailors have been common since Roman times. The more we learn about dolphins, the more we realize that their society is more complex than people previously imagined. They look after other dolphins when they are ill, care for pregnant mothers and protect the weakest in the community, as we do. Some scientists have suggested that dolphins have a language but it is much more probable that they communicate with each other without needing words. Could any of these mammals be more intelligent than man? Certainly the most common argument in favor of man's superiority over them that we can kill them more easily than they can kill us is the least satisfactory. On the contrary, the more we discover about these remarkable creatures, the less we appear superior when we destroy them.

14. b. Translate the given passage into Tamil.
Erosion of America's farmland by wind and water has been a problem since settlers first put the prairies and grasslands under the plow in the nineteenth century. By the 1930s, more than 282 million acres of farmland were damaged by erosion. After 40 years of conservation efforts, soil erosion has accelerated due to new demands placed on the land by heavy crop production. In the years ahead, soil erosion and the pollution problems it causes are likely to replace petroleum scarcity as the nation's most critical natural resource problem..

15. a. Translate the given passage into English

15. b. Paraphrase the given content in your own words (English).
Using ICT gives the learners real-life contact with, and exposure to; the cultures of the peoples and countries where the new language is spoken and enables children to access and research information worldwide. The opportunity for children to develop an interest in the culture of other nations through comparison with their own is an integral part of primary languages entitlement. Using ICT, particularly email, blogs and video conferencing, facilitates children's interaction and communication with native speakers and other communities by enabling them to use language for real purposes and in real contexts. ICT both supports and integrates literacy skills. It enhances interactive teaching and learning styles and provides many opportunities for creativity. When used imaginatively it can stimulate curiosity about how languages work, raise the level of cognitive challenge, and extend children's ability to be independent in their use of the new language. ICT offers a powerful way of enabling children to be fully engaged in their own language learning process. Tasks done at

home, at school or on a trip abroad can be uploaded to a learning platform, enabling teachers, parents and children to make comments and celebrate achievement. There is an increasing range of effective software to support primary languages teaching and learning. Chosen carefully and used creatively, it enables teachers and children to engage with tasks in ways that are not possible with printed materials. ICT has the potential to support non-specialist teachers, through access to native speaker models of the new language which can be used to support acquisition of linguistic skills, or to extend the range of voices in the classroom. Through the use of a learning platform, ICT can supplement training programmes to help ensure that support is maintained over the coming years as increasing numbers of teachers are trained to teach a new language at primary level. Interactive whiteboards, DVDs and the use of digital projectors can provide stimulating visual aids as a valuable strategy to support understanding and recall in the new language. ICT has the potential to increase the percentage of learning that involves the traditionally more difficult literacy skills by maximising exposure to the written word.
